

incorporating

1st ENA WORKSHOP and 9th EAN_{NORM} WORKSHOP Nov. 19th - 22nd 2018 in Katowice, Poland

- Second Announcement -

In line with the previous successful eighth EAN_{NORM} workshops, the 1st ENA workshop will be organized in November 2018 in Katowice (Poland), continuing the successful format of the EAN_{NORM} workshops under the auspices of the European NORM Association (ENA).

Invited Speakers (confirmed)

Horst Monken-Fernandes (IAEA, Waste Technology Section)
Halil Burçin Okyar (IAEA, Occupational Radiation Protection Unit)
J.F. Lecomte (ICRP Task Group 76 Application of the Commission's Recommendations to NORM)
Andre Poffijn (former radiation expert FANC/UGENT, Belgium)

Topical sessions

NORM in the environment – releases of radium rich formation and process water
NORM in building materials - practical approaches to control radioactivity and NORM use in construction industry

NORM in industry - looking beyond oil and gas, phosphorite and red mud

Speaker's Corner - Short information from Member States 10 months after the implementation deadline of the EU BSS into national regulation

ENA Working group discussions

Short training courses

Application of gamma spectrometry for NORM measurements
Application of LSC for NORM measurement
Inventory of NORM and existing regulatory context

Exhibition of measurement devices and business opportunities

Abstract and paper submission

New deadline for abstract submission is June 30th, 2018

Further information is available from the workshop website: www.ena1.gig.eu.

Breaking news!

IAEA ENVIRONET NORM Project Technical Meeting: IAEA through the Network of Environmental Management and Remediation (ENVIRONET) is running a project on NORM that intends to share good practices and provide participants with practical guidance on the management of NORM wastes/residues. In line with the successfully held parallel events of ENVIRONET and EAN_{NORM} in 2016 in Stockholm, a Technical Meeting of the ENVIRONET NORM Project is being planned to occur in parallel to the workshop of the ENA in Katowice. This would allow maximum interaction between both communities with a clear mutual benefit. For further information on the project and the application procedure please contact the **IAEA Scientific Secretary, Mr. Horst Monken-Fernandes** (h.monken-fernandes@iaea.org).

See you in November in Katowice.
