

Objectives of ERA

1. To assist in reducing the health burden from radon in Europe
2. To promote public awareness of radon
3. To encourage the development of quality standards in indoor radon metrology, remediation, prevention and control technologies
4. To provide a communication network for all radon professionals and other relevant groups
5. To serve as a consultative body to national and international agencies in all matters relating to the reduction of the risk from exposure to radon
6. To assist in the organization of radon conferences and contribute to education and training in all aspects of the radon field

The European Radon Association is a non-profit International Organisation registered under Belgian law (number 549.923.484).

 [search for European Radon Association group](#)

There is a large and growing community in Europe of professionals such as scientists, technologists, public health officials and decision makers working in the radon field. Their areas of interest range from epidemiology, radiation dosimetry, instrument development and measurement protocols, remediation and prevention construction technologies to control strategies and regulation. In recognition of this reality the European Radon Association (ERA) has been formed aimed at serving the interests of the European radon community and to assist in reducing the health burden of Radon in Europe.

Benefits of Membership

ERA is a key focus point for radon matters in Europe. Within ERA scientists, researchers and companies in the radon field can benefit from access to prospective partners for collaboration; the opportunity for networking is unrivalled.

ERA provides you with educational, technical and professional benefits that result from the exchange of radon information within the ERA membership.

The ERA website is the best contact point to get information about forthcoming radon events, new development and contains a membership list. Access to the Members Only section of the ERA website will keep members up to date with radon matters and provide you or your business with a free listing in the Members Directory section of the ERA website.

Membership enables attendance at General Assembly meetings with voting rights and entitles you to reduced registration fees for events organized by ERA.

Dedicated to Improving Awareness & Reducing the Health Risk of Radon Exposure Across Europe

How to join ERA

ERA welcomes membership applications from those who have an active interest in the field of radon.

You may apply to join ERA under a number of membership categories including Individual Member and Company Member.

If you would like to express an interest in applying for membership you can do so by completing the application form online at the ERA website or at

www.bit.ly/radoneurope

The ERA secretary (secretary@radoneurope.org) will process your form and contact you regarding your application and payment of the necessary fees (the annual fees for each type of membership are listed in the application form).

Next Meeting

The General Assembly and the 3rd ERA Radon Workshop will be held in Krakow on Friday 29th May 2015. Details of the workshop, topics to be covered, speakers etc will be given soon on the ERA website (www.radoneurope.org).

ERA Executive Committee

President: James Mc Laughlin
(University College Dublin – Ireland)

Vice-president: Matej Neznal
(Radon v.o.s – Czech Republic)

Treasurer: Boris Dehandschutter
(FANC – Belgium)

Secretary: José – Luis Gutiérrez
(University of Cantabria – Spain)

Members:

André Poffijn (FANC – Belgium)
Bernard Collignan (CSTB – France)
Borja Frutos Vázquez
(CSIC-Instituto de Ciencias de la Construcción

Eduardo Torroja – España)

Carlos Sainz Fernández
(University of Cantabria – Spain)

Constantin Cosma
(University Babes-Bolyai – Romania)

Johan Winthelm
(Indepndia - Sweden/Norway)

Krzysztof Kozak (IFJ PAN – Poland)

Luis S. Quindos Poncela
(University of Cantabria – Spain)

Martin Freeman
(PropertECO/UK Radon Association—England)

Per Nilsson
(Landauer Nordic /Swedish Radon Association)
