

European Radon Day

7th November 2015

Your journey to radon awareness

Radon is:

The second leading cause of lung cancer, after smoking*

*(World Health Organisation)

Where is radon found?

Is the only way to know. It is cheap & easy to do

Radon Testing:

Found in any building, in any location

Radon can be:

Is my building affected?

Can high radon levels be reduced?

Can be reduced by recognised mitigation methods

High radon levels:

Can be installed in new buildings during construction

Radon protection:

Are new buildings safe?

Requires all EU countries to develop a radon action plan

New legislation:

Are there laws about radon?

Find out more
